2017 Workshops

In this two-day intensive workshop we will explore the intricacies of painting moving water and the seascape in pastel. We will use under-painting to assist the development of the layers of transparency found in water. Topics to be covered include how to depict sea spray and sea foam, creating depth and distance in water, wet sand, creating strong compositions and working with values in water. There will be a daily demonstration and group critiques, along with plenty of one-on-one instruction at your easel.
